loganawatson2@gmail.com

Front end developer.

Experience

Bass Pro Shops 2017-Present
- Served customers in fast and efficient manner.

America's Thrift Store 2016-2016
- Take customer donations and place them in their respective locations.

Education

- *TheOdinProject https://www.theodinproject.com/*

- *Tyler McGinnis' React bootcamp https://www.youtube.com/watch?v=8GXXGJRDMdQ*

- *TheNetNinja's Node Course https://www.youtube.com/watch?v=w-7RQ46RgxU&t=1s*

Projects

React-Pokedex *https://lwatson2.github.io/react-pokedex/*

A database built mobile-first of pokemon gathered from pokeapi.co. Users can search pokemon by name or id to get their details. Features a filter list where users can filter by pokemon type.

Technologies used: Reactjs.

Image-Gallery *https://aqueous-mesa-52857.herokuapp.com/*

A image gallery where either I or a family member sign in and upload or delete images. Users can view these images on a carousel.

Technologies used: ReactJs, Nodejs, MongoDb, and AWS.

ReactChat *https://floating-woodland-27702.herokuapp.com/*

A chat application built mobile-first where users can create a user and login in to chat. Users can join various rooms and talk about different topics. Features a user authentication system built with Passportjs and jsonwebtokens.

Technologies used: ReactJs, Nodejs, MongoDb, and socket.io.
